1. Flow Control

4. Chapter: Flow Control

1. Flow Control Questions

4.1.1. What is the expected output?

Author: JavaChamp Team

What is the expected output?

```
public class LoopTest {
public static void goLoop(int a) {

start: for (int i = 1; i < 2; i++) {
for (int j = 1; j < 2; j++) {
if (a < 5) {
break;
}
System.out.print(i + j);
}
if (a > 5) {
break start;
}
}
}

public static void main(String args[]) {
LoopTest.goLoop(15);
}
}
```

Please choose only one answer:

- 2
- No output is produced
- Compile Error
- Runtime exception is thrown
- 24

4.1.2. What is the expected output?

Author: JavaChamp Team

What is the expected output?

```
public class LoopTest {
    public static void goLoop(int a) {

        start: for (int i = 1; i < 2; i++) {
            for (int j = 1; j < 2; j++) {
                if (a > 5) {
                    break start;
                }
                System.out.print(i + j);

            }
        }

    }

    public static void main(String args[]) {
        LoopTest.goLoop(15);

    }
}
```

Please choose only one answer:

- 2
- No output is produced
- Compile Error
- Runtime exception is thrown
- 24

Question: [How to use continue and break in java loop?](#)

Flashcards:

<http://www.quizover.com/flashcards/how-to-use-continue-and-break-in-java-loop?pdf=3044>

Interactive Question:

<http://www.quizover.com/question/how-to-use-continue-and-break-in-java-loop?pdf=3044>

4.1.7. What is the result of compiling and running the following code?

Author: Yasser Ibrahim

What is the result of compiling and running the following code?

```
public static void main(String[] args) {
    int j = 10;
    switch (1) {
        case 20:
            j += 1;
        case 40:
            j += 2;
        default:
            j += 3;
        case 0:
            j += 4;
    }
    System.out.print(j);
}
```

Please choose only one answer:

- Compile error, can't use constant 1 in the switch, must be final variable
- Compile error, default must be the last statement after all the cases
- Compile error, must have break statement within each case
- 17
- 13

Interactive Question:

<http://www.quizover.com/question/how-to-write-java-switch-statement?pdf=3044>

4.1.8. What is the result of compiling and running the following code?

Author: Yasser Ibrahim

What is the result of compiling and running the following code?

```
public class Tester {  
    public static void main(String[] args) {  
  
        do {  
            System.out.print("inside do");  
        } while (false);  
  
        while (false) {  
            System.out.print("inside while");  
        }  
        System.out.print("outside");  
    }  
}
```

Please choose only one answer:

- inside dooutside
- outside
- compilation error because of the second loop (while statement)

4.1.9. Which of the following is correct after running this code ?

Author: Yasser Ibrahim

Which of the following is correct after running this code ?

```
public class Tester {  
  
    public static void main(String[] args) {  
        char code = 'a';  
        for (int i = 1; i <= 10; i++) {  
            switch (i) {  
  
                case 5: {  
                    System.out.println("match");  
                }  
  
                default: {  
                    System.out.println("default");  
                }  
            }  
        }  
    }  
}
```

Please choose all the answers that apply:

- match will be printed 0 time
- match will be printed one time
- default will be printed 10 times
- default will be printed 11 times

4.1.13. What is the output of this code?

Author: Abhishek Sawant

What is the output of this code?

```
public class SwitchTest{
enum Color {RED,GREEN,BLUE};
public static void main(String []args){
Color clr = Color.GREEN;
long x = 2;

switch(x){ // #1
case 1:
System.out.println("1");
break;

case 2:
System.out.println("2");

case 3:
System.out.println("3");
break;

default:
System.out.println("default");
break;
}

switch(clr){ // #2
case RED:
System.out.println("Red");
break;

case GREEN:
System.out.println("Green");
break;

case BLUE:
System.out.println("Blue");
break;
}
}
```

Please choose only one answer:

- 2 Green
- 2 3 Green
- 2 3
- Compilation error at #1
- Compilation error at #2
- Runtime exception at #2
