Author: Ryan Lowe

How could a business best use a Microsoft Excel spreadsheet to reflect and/or enhance its brand?

Please choose only one answer:

- A business could use a spreadsheet to set itself apart from other companies that do not use spreadsheets.
- A business could use a spreadsheet to vault its image and reputation among peer companies.
- Because spreadsheets are so expensive, a business could advertise its desire to use spreadsheets in order to attract wealthy donors to endorse the business.
- A business could incorporate specific colors and designs into its spreadsheets in order to reflect and promote its brand.

4.1.2. How could you best derive a total sum for all the values in a Micro...

Author: Ryan Lowe

How could you best derive a total sum for all the values in a Microsoft Excel spreadsheet column?

Please choose only one answer:

- It is not possible to perform this operation in a spreadsheet unless it has been formatted.
- You could select the range, then cut and paste it into the calculation window.
- You could select the empty cell below the last value in the column and then enter the following formula in the formula toolbar: =SUM(A1:A5), with A1:A5 being an example of the range of all the cells with values in the column.
- You could use a calculator and enter the total of the column manually.

4.1.3. What is the difference between a column and a row in a spreadsheet?

Author: Ryan Lowe

What is the difference between a column and a row in a spreadsheet?

Please choose only one answer:

- A column is vertical and a row is horizontal.
- These terms are interchangeable; rows and columns are the same thing.
- A row is vertical and a column is horizontal.
- A row is a column unless a mathematical formula is entered into the spreadsheet.
